

Risk Consulting Aviation Security Consulting

Working with us

G4S Risk Consulting's specialist aviation security consultants and associates provide aviation security solutions, strategic advice and operational security assistance to civil aviation authorities, aviation managers, airlines and ground operators worldwide.

Our clients value our ability to build appropriate solutions by drawing on the best expertise within the industry. We pride ourselves in working transparently with niche security subject matter experts who complement and expand the range of services we can bring to clients. Our core strength is the ability to build trusted relationships with clients and partners who share our values of integrity, innovation and impartiality.

Our AVSEC heritage

G4S Risk Consulting builds on the G4S legacy in aviation security by drawing on niche and specialist AVSEC expertise to enhance organisational resilience and security. G4S is well established as a major partner in the aviation industry – we currently provide secure solutions for 61 airports and 81 airlines in 49 countries and have played a vital role in the aviation sector for many years.

Our services include crew screening, passenger profiling, visa and document checking, cargo and hold baggage screening, aircraft searches and protection, weapons handling, aircraft marshalling, perimeter security, information desk assistance, repatriation or deportation, access control and staff training.

What we offer

- Drafting Threat and Risk Assessments through UK Department for Transport (DfT) Certificated threat assessors with vast experience of assessing threats against aviation entities and in conducting emergency planning and incident response support
- Embedding and developing Security Management Systems (SeMS)
- Conducting security audits and planning to ICAO Annex 17 standards and beyond, especially in high risk locations
- Developing security strategy, policy and plans
- Delivering Threat Assessment and Aviation Security management training
- Training and mentoring aviation security staff to ICAO and DfT standards
- Creating resilient security cultures through business change programmes

“Recent events highlight the enduring and evolving threat to civil aviation, with terrorists retaining their unhealthy interest in the industry. G4S has been at the forefront of helping organisations enhance their security management, capability, delivery and assurance. Being part of this credible and specialist team has enabled me to work collaboratively with organisations to make a positive difference.”

Andy Blackwell, Aviation Security Consultant, G4S Risk Consulting [Former Head of Corporate Security, Virgin Atlantic]

Risk Consulting Aviation Security Consulting

Case Study: Kuwait International Airport

G4S Risk Consulting has been supporting the Kuwait Ministry of Interior (Mol) to better secure the country's international airport and meet its international obligations since 2016. Working collaboratively we audited the airport's security systems, trained, and mentored assets for the Mol and leveraged the operational scale of our sister company G4S Kuwait to recruit, train and deploy 400 security operators to secure the airport. Services provided include:

- **Security audit** of the airport's technical, physical and procedural security measures against ICAO Annex 17 compliance requirements and recommendations to achieve EC 300 standards
- **Training Needs Analysis** of existing Kuwaiti Mol security staff to cover desired end state of an additional c.400 new staff and implement required training
- **Mentoring and supervision** of existing Kuwaiti Mol staff to provide an immediate improvement in security standards for passenger operations
- **Security design** advice for airport access control
- Delivery of a compliant and updated Airport **Security Programme**
- **Ongoing support and advice** by embedded AVSEC consultant to continually review and improve security standards at the airport

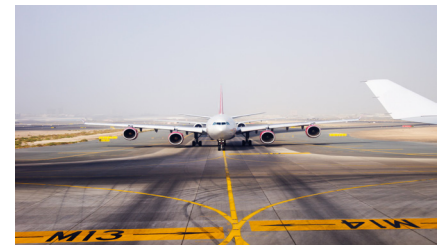

Case Study: Irish Aviation Authority

Since 2016 G4S Risk Consulting has supported the Irish Aviation Authority (IAA) develop and implement Security Management Systems (SeMS) for Air Traffic Management (ATM) across Ireland. Our ongoing support includes:

- Development of IAA ATM specific SeMS Gap analysis tool, completion of gap analysis and evaluation of results to inform and shape development of **Implementation Plan**
- **Embedding and testing of SeMS**, including training and penetration testing
- Development of a high level **Insider Threat strategy**
- **Site security vulnerability assessment** of new ATM facilities at Dublin International Airport
- **Penetration Testing and Security Awareness Training**

"I can fully recommend, without reservation, G4S Risk Consulting and their affiliates as a wholly dependable and reliable supplier and noted subject matter experts in the field of security consulting services."

*Martin Gamble, Property and Security Manager,
Irish Aviation Authority*
